2. STRATEGY

Every paper submitted to magic must have following bullets as an example:

- **8 1/2" x 11" paper size**
- Portrait Orientation
- Two-column format for the body of the document
- Top margin: 0.75"
- Bottom margin: 1.0"
- Left and right margins: 0.75"

Light geometry frequency flow energy, relations brain wave core geometry.

II. Duo instructions

After you enter the title and author information enter a few blank lines and then insert a Continuous section break. Now you must define this section to be in two-column format. To do this in *Word*, under the "Format" menu select "Columns." This option will open the Columns window. It has an input box for the number of columns. Enter 2 and then set the spacing to 0.2" and select equal column widths. If you have the margin widths set correctly, the width of the column should display as 3.40." If it does not, go to the "File" menu and select "Page Setup - Margins." This will

open the "Page Setup" window that will allow you to set the top and bottom margins to 1" and the right and left margins to 0.75." Every word processor will have its own method of accomplishing the above setting, however, most follow the same format.
